

Groundwork — per-market budget model

Built 9 September 2026 by `_bench/build_market_budget_model.py`. Shareable with a partner; can be walked through with

What it is: one market of the Groundwork method, costed at the level of the process rather than the calendar. Ten phases each with the effort it carries and the cost lines it opens. The effort per phase is the average of the three pilot markets, derived from the practice's time record by workstream; no individual day or meeting appears anywhere.

How to read it: the Phases sheet is the shape of one market and is the sheet to walk a client through. The Budget sheet tells the price: the practice's fixed fee and retainer share (sized off the benchmarked model), the certified researchers, the field data party lines by kind. Amber cells are inputs Juno enters per market. Blue cells are assumptions with the pilot's value prefilling.

What is not here: any hourly rate, any figure for a third party, and any market's individual record. The pilot's markets are named. The practice's private P&L holds the rate and the per-market actuals and is not this document.

Move	Phase	Owner
Audit and gap-find	Phase 0 · Spin-up	Project manager
Audit and gap-find	Phase 1 · Audit and gap-find	Research lead
Baseline the before-picture	Phase 2 · Baseline the before-picture	Research lead
Discover on the ground	Phase 3 · Champion mapping and out	Project manager, with the
Discover on the ground	Phase 4 · Discovery visit	Research lead on the ground
Discover on the ground	Phase 5 · Production visit	Producer (production partner)
Discover on the ground	Phase 6 · Capture to transcript to interview	Research lead
Synthesize	Phase 7 · Synthesis	Research lead, with editor
Synthesize	Phase 8 · The review ramp	Project manager
Synthesize	Phase 9 · Close-out and codify	Research lead
One market, all phases		

Effort kind	Practice days per market (pilot average)	Researcher days (assumption)	Field days
programme	2.6	0	0.0
desk	2.3	4	0.0
desk	0.0	3	0.0
desk	0.0	3	0.0
field	5.7	6	1.3
field	0.5	0	1.3
processing	0.0	4	0.0
desk	7.6	3	0.0
review	0.5	1	0.0
desk	1.2	1	0.0
	20.4	25.0	2.6

What the phase produces

A dated calendar with sourced walls; a market folder; a citation prefix

The market's rows in the Claims Register, each with a source

The before-picture on two instruments: material delta and belief delta

The champion map: tiers, consent, contact paths

Recorded conversations, each tape named for market, room size and language

Film and photography per the deliverable set; releases on file

Transcripts with speakers named and checked; every claim registered; an intel delta per conversation

The Market Impact Assessment, story spines, champion profiles, evidence and sources

The team's read, then the client's preview, then the wall

The learnings log entries, classed; the next market's kit updated

It is finished when

every date names its source

every register row names a source

both deltas sit on the same instrument as every other market

every mapped voice carries a tier, consent and a contact path

every tape is named and its speakers confirmed by someone who was there

releases on file for everyone filmed; the shot list traces to the champion map

every quotable line traces to a tape; every figure to a register row

the report cites the register and the checks pass

the team's read precedes the client's; every send cleared the checks

at least one classed learning per market

Line	Per market	Kind
THE METHOD		
Per-market platform fee (the method, stood up in this market)	\$16,000	assume
Standards and quality retainer, this market's share	\$12,500	assume
Annual re-score (from year two)	\$6,400	
THE PEOPLE		
Certified-researcher days	25.0	
Certified-researcher day cost	INPUT	INPUT
Certified researchers, this market	INPUT	
Practice field days (deep-dive presence)	2.6	
Practice field days at the flat day rate	\$2,600	read
THIRD PARTIES, BY KIND		
Local research partner	INPUT	INPUT
Interpretation and translation	INPUT	INPUT
Local producer	INPUT	INPUT
Production partner (film and photography)	INPUT	INPUT
Casting and releases	INPUT	INPUT
Travel and lodging, team	INPUT	INPUT
Third parties, this market	INPUT	
THE MARKET		
Method + people + field	\$31,100	
Contingency reserve	\$3,888	assume
One market, all-in (excluding third parties until entire market is entered)	\$34,988	
Status	INCOMPLETE: 9 inputs to enter	

How it is sized

Benchmark band midpoint from the practice's pricing model; the band itself is on the Bands sheet

Programme retainer midpoint $\times$ months a market runs $\div$ markets sharing it (three and three prefilled)

Forty percent of the platform fee, per the pricing model; not in year one

Sum of the Phases sheet

What Juno pays a certified researcher per day

days $\times$ day cost

Sum of the Phases sheet

Flat travel-day rate from the practice's pricing model

where the market needs local credibility or a language

where interviews are not in English

production logistics in market

per market, per the deliverable set

subjects, releases, minors' consent

at cost, outside any fixed fee

reads INPUT until every line is a number

before third parties and contingency

Ten to fifteen percent of the engagement per the pricing model; twelve and a half prefilled

Component	Low	High
Per-market platform fee	\$12,000	\$20,000
Standards and quality retainer, per month	\$10,000	\$15,000
Certification, per seat	\$2,000	\$3,500
Annual re-score	40% of platform fee	
Contingency reserve	10%	15%

Anchored to

brand-tracker-per-market norm plus a methodology royalty on a market budget

fractional-director band

professional-certification norms

mirrors the EcoVadis reassessment convention

line item in every statement of work
